HEALTHCARE FACILITIES

PROJECT: Boys Town National Research Hospital, Omaha, NE

CONSTRUCTION TYPE: New Construction

PRODUCTS USED: Architect Series® and Designer Series® Casement Windows

WHY PELLA?

- Designer Series aluminum-clad wood casement windows feature cordless between-the-glass blinds – ideal for the hospital’s patient rooms and the surgical staging area, where light and privacy control are essential.
- Cordless, between-the-glass blinds are protected from dust and damage – to help create a cleaner indoor environment, as well as reduce maintenance costs.
- Architect Series aluminum-clad wood casement windows were chosen for the hospital’s front entrance to create a quality first impression for patients and visitors.
- The local Pella representative was an integral member of the project team to help ensure each phase of the project went smoothly.

PROJECT: Vollum Institute for Advanced Biomedical Research, Portland, OR

CONSTRUCTION TYPE: New Construction

PRODUCTS USED: Designer Series Casement and Fixed Frame Windows

WHY PELLA?

- Designer Series windows with Pella’s exclusive Slimshade® blinds have no roomside cords. And since the blinds are between the glass, they’re protected from dust and harbor fewer allergens* than roomside window treatments.
- Stained wood interiors add warmth and character to support the building’s noninstitutional atmosphere, while complementing other interior wood finishes.
- Blinds protected between the glass help reduce long-term maintenance costs, improve energy performance and make cleaning easier.

* Based on data from research conducted by the Department of Occupational and Environmental Health at The University of Iowa.

PROJECT: South Franklin Circle Senior Community, Chagrin Falls, OH

CONSTRUCTION TYPE: New Construction

PRODUCTS USED: Architect Series® Aluminum-Clad Wood Casement Windows and Sliding and Hinged Patio Doors and Pella® 450 Series Aluminum-Clad Wood Double-Hung and Casement Windows

WHY PELLA?

- Architect Series products with Integral Light Technology® grilles and Pella 450 Series windows with Simulated-Divided-Light grilles feature the look of true divided light while providing exceptional energy efficiency, structural integrity and water-resistant performance.
- Pella 450 Series double-hung windows feature a block-and-tackle balancing system that makes raising and lowering both sashes easier – an important consideration for residents.
- The South Franklin Circle general contractors chose to work with trained window and door professionals who would stand by their products – and Pella answered the call.

PROJECT: Dr. Ehlert's Office, Neenah, WI

CONSTRUCTION TYPE: New Construction

PRODUCTS USED: Designer Series® Casement Windows

WHY PELLA?

- Pella products helped the project team create a comfortable environment for the children and families in need of dental care.
- The patient rooms feature inviting interiors, complemented by windows that highlight the warmth of wood with their beautiful stained finishes.
- Window combinations that include operable windows not only enhance the view, but give occupants the opportunity to let in fresh air and a gentle breeze.
- Aluminum-clad exteriors with EnduraClad® protective finish help protect the wood and reduce maintenance costs.
