

OFFICE BUILDINGS

Featuring Window and Door Solutions from Pella

Why Pella? Whether you're a developer, owner, contractor or architect, Pella understands the challenges you face. We know it's not just a project on the line — it's your reputation and investment. That's why we're dedicated to being your source for solutions. Because Pella's more than a supplier — we're a complete fenestration partner you can trust.

Project: PAMCO Executive Office Suites, Appleton, WI

Construction Type: New Construction

Product Used: Designer Series® Casement Windows

Why Pella?

- Pella's variety of unique aesthetic options — such as warm wood interiors and aluminum-clad exteriors — influenced the design.
- Square transoms and casement windows with between-the-glass blinds provide design flexibility and a uniform appearance.
- Between-the-glass blinds are protected from dust and damage. In fact, windows with ordinary roomside blinds accumulate 200 times more of certain airborne allergens than Pella® Designer Series windows with between-the-glass blinds.*
- Dual-glazing provides outstanding energy efficiency and reduced sound transmission for a more comfortable environment year-round.

Project: Hoffman Corporation, Appleton, WI

Construction Type: New Construction

Product Used: Architect Series® and Designer Series Casement Windows

Why Pella?

- Sustainable product attributes support "green" projects.
- Between-the-glass blinds for the east- and west-facing windows block unwanted heat gain.
- Triple-glazing with multiple Low-E coatings reduce heat loss on the north side of the building.
- Clear Low-E insulating glass above light shelves provides abundant natural light, and gray Low-E insulating glass below light shelves controls glare.

* Based on data from research conducted by the Department of Occupational and Environmental Health at The University of Iowa. Improved health for allergy sufferers.

Project: Utilicorp United World Headquarters, Kansas City, MO

Construction Type: Historic Renovation

Product Used: Architect Series® Double-Hung Windows

Why Pella?

- High-quality Pella® products were approved for this historic building involving federal rehabilitation tax credits.
- Wood windows with beautiful stained interiors have excellent insulating properties; plus, wood is a renewable resource.
- Energy-efficient Low-E insulating glass provides natural light with less heat transmission.
- Operable double-hung windows allow natural ventilation.
- Local Pella supplier provided product installation.

Project: Members First Credit Union, Pace, FL

Construction Type: New Construction

Product Used: Pella Impervia® Fixed-Frame Windows

Why Pella?

- Made from Duracast® — an engineered fiberglass composite that's more durable than aluminum, offers the thermal efficiency of wood and is priced competitively with vinyl.
- Material won't need to be painted, so there are no finishing or maintenance costs.
- Factory-glazed and preassembled for easy installation.
- Design flexibility allows for unique window groupings, including clerestory, punched, stacked and window wall.
- Pella's competitive advantages include technical support, a competitive price, a variety of options and an outstanding warranty.

* In testing performed in accordance with ASTM testing standards, Pella's Duracast has displayed superior performance in strength, ability to withstand extreme heat and cold, and resistance to dents and scratches.
